#### 1. PIN ATM

a. Penjelasan Singkat

Merupakan prototype sebuah mesin untuk input PIN ATM. Perhatikan bahwa tampilan menunjukkan strip (----) maka input dapat dimasukkan. PIN berupa 4 Digit Angka 0-9 input akan dimasukkan kesebelah kiri LED dan Anda dapat menghapus angka jika salah memasukkan dengan menekan Correct, atau Anda dapat mereset dengan menekan Clear. Untuk mengetahui hasil yang benar/salah dengan pin yang telah diatur, setelah Anda memasukkan 4 angka PIN Anda dapat menekan Enter.

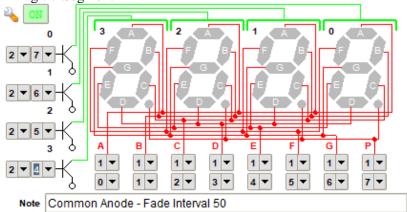

### b. Interfacing

## i. Keypad

- 1. A Enter
- 2. C Clear/Reset
- 3. D Correct/Backspace
- 4. 0-9 Input Angka
- 5. B, \* dan # tidak dgunakan

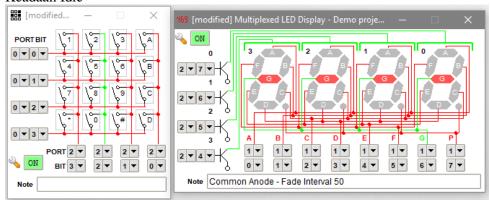

## ii. 4-Digit 7-Segment

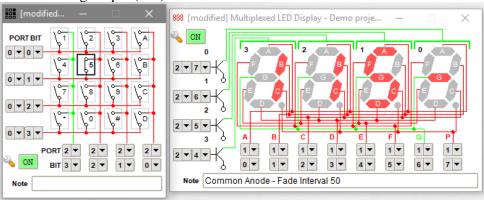

- 1. Indikator display FAIL menunjukkan bahwa PIN salah
- 2. Indikator display ACC menunjukkan bahwa PIN benar

## c. Simulasi

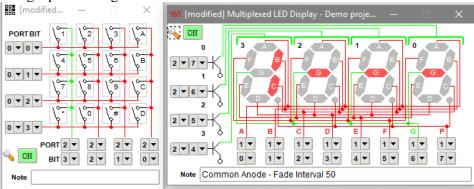

i. Keadaan Idle

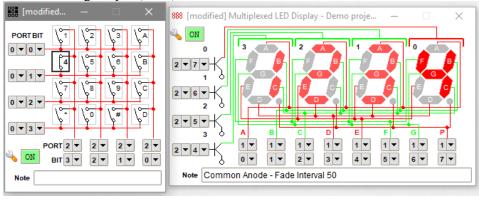

ii. Keadaan 3 Digit Input (115)

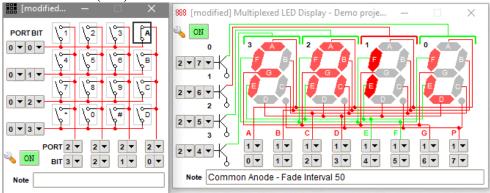

iii. Menghapus dua angka

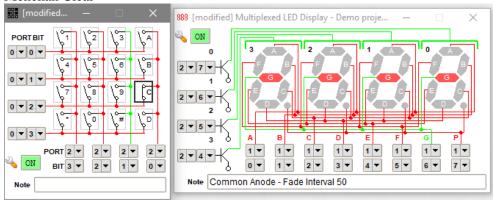

iv. Keadaan 4 Digit Input (1234)

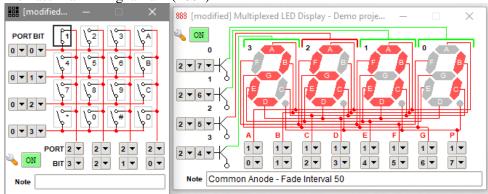

v. Menekan Enter (Fail)

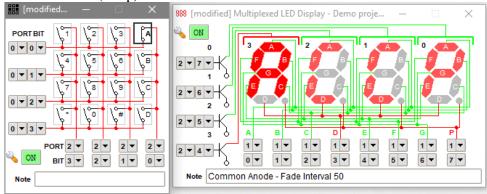

vi. Menekan Clear

vii. Memasukkan 4 Angka Lain (2601)

viii. Menekan Enter (Accp)

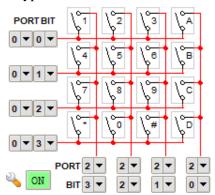

### 2. KALKULATOR

### a. Penjelasan Singkat

Kalkulator ini merupakan kalkulator yang berjalan hanya menerima input sebanyak satu bit dan dapat melakukan dua operasi yaitu pertambahan dan pengurangan, untuk hasil pengurangan juga telah didukung dengan tanda negatif jika hasil merupakan angka negatif. Cara menggunakannya adalah perhatikan LED agar dalam posisi mati (idle) atau dengan cara menekan CLEAR, kemudian masukkan input pertama sampai Lampu 0 menyala, kemudian input kedua sampai Lampu 1 menyala. Kemudian Anda dapat memilih operasi pertambahan atau pengurangan sampai hasil ditunjukkan dan lampu indikator 0 dan 1 menyala. Anda dapat membersihkan kalkulator kapan saja sampai lampu LED mati semua.

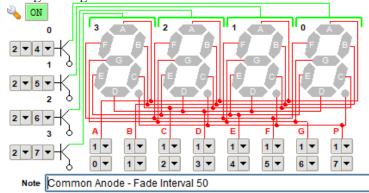

# b. Interfacing

## i. Keypad

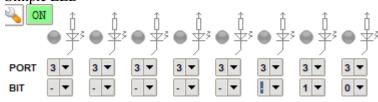

- 1. A Pertambahan
- 2. B Pengurangan
- 3. C dan D Clear/Reset
- 4. Button 0-9 Input Number
- 5. \* dan # tidak digunakan

### ii. 4-Digit 7-Segment

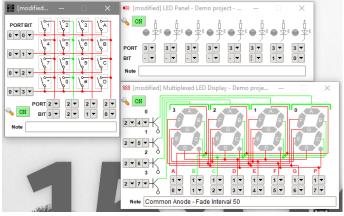

## iii. Simple LED

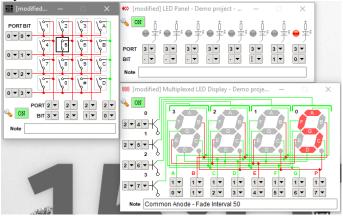

- 1. Semua Lampu Mati Siap menerima Input
- 2. Lampu 0 Menyala Telah Masuk Input Pertama
- 3. Lampu 1 Menyala Telah Masuk Input Kedua
- 4. Lampu 0 dan 1 Menyala Hasil Dikeluarkan

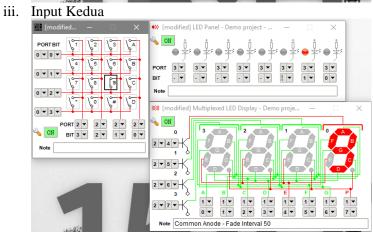

#### c. Simulasi

i. Keadaan Idle

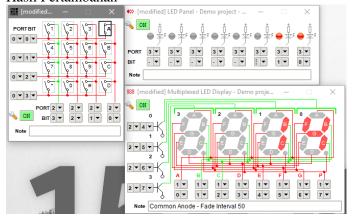

ii. Input Pertama

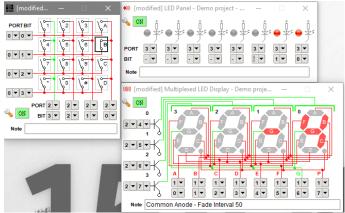

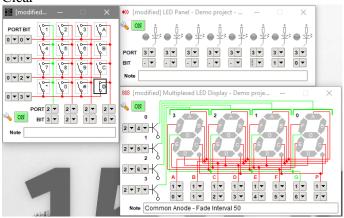

iv. Hasil Pertambahan

v. Hasil Pengurangan

# vi. Clear

#### LAMPIRAN SOURCE CODE
